REPORT OF THE DIRECTORS OF THE MANAGEMENT COMPANY

The Board of Directors of Al Meezan Investment Management Limited, the management company of Meezan Islamic Fund is pleased to present the un-audited financial statements of the fund for the quarter ended September 30, 2008.

Market Review

Amid increased economic challenges and political uncertainty during the first quarter of FY09, KSE 100 index maintained a relatively bearish trend. Overall, the KSE-100 index during this quarter plunged by 3,110 points or 25.3% to end the quarter at 9,179 points on an average daily turnover of 66.28 million shares.

Economic Review

The macroeconomic outlook remained bearish during the quarter as inflationary pressures mounted and current account deficit continued to widen unabated. The main reason for widening of the deficit was worsening of trade balance. Due to the extraordinary increase in international crude prices, which peaked at US\$ 147 per barrel in mid July, and hike in food prices, Pakistan's trade deficit for the first quarter FY09 reached US\$ 5.55 billion, an increase of 53% over the corresponding period. As a result, foreign exchange reserves declined from US\$ 11.1 billion in June 2008 to US\$ 8.1 billion at the end of the quarter. This created pressure on rupee against US dollar, which depreciated by 12% to close the quarter at Rs. 78.25.

The economy was further hurt by the uncertain political situation as foreign investors remained cautious during the quarter, resulting in a decline in foreign exchange reserves and foreign portfolio investment. However, the remittance inflows remained strong, with the first quarter FY09 figure totaling US \$ 1.88 billion, and provided some support to the balance of payment situation. On domestic front, Government of Pakistan remained ahead of its tax collection target in three months and collected Rs. 253 billion which also helped in providing some relief to the burgeoning government borrowing.

Equity Market Review

The downward trend at KSE that began in the final quarter of last year continued into the first quarter of FY09. In order to arrest the sharp decline, Securities and Exchange Commission of Pakistan (SECP) had changed the circuit breakers to a floor of 1% and a cap of 10% on June 24, 2008. This measure, however, did not improve the situation and created a problem for margin traders who wanted an exit. Due to drying up of volumes after the introduction of these circuit breakers, the SECP decided to revert them back to the original 5% level on July 11, 2008.

In order to restore investor confidence, SECP and KSE took some market stabilization measures which provided some support to the market. However, the unabated economic pressures along with Moody's warning to downgrade the country's rating resulted in a market meltdown.

To stem further downslide in the market, the KSE Board of Directors on August 27, 2008 decided to place a floor on the index at a level of 9,144 based on the closing prices of securities that day. Since there is no price discovery since then, investors have stayed away from the market during the month of September and volumes are down to less than a million shares a day.

The US sub prime mortgages crises resulting in the collapse of Lehman Brothers, the institution which represented more than a 100 year old legacy of the US financial markets, started the meltdown of the global equities. Even after their governments' continuous liquidity injections, the bearish trend continued so much so that IMF termed this crisis as the worst after Great Depression. In line with increasing outflows from emerging markets, foreigners remained net seller at KSE, with a total net outflow of US\$ 142 million in the first quarter of FY09.

Performance Review

The return on Dow Jones Islamic Markets Pakistan Index serves as the benchmark for Meezan Islamic Fund (MIF). During the quarter ended September 30, 2008, MIF declined by 26.63% as compared to the benchmark which declined by 27.94%, thus outperforming the benchmark by 1.31% during the quarter.

MIF during the first quarter FY 09 incurred a net loss of Rs. 1,568 million as compared to net profit of Rs. 371 million earned during corresponding period last year.

For the quarter ended September 30, 2008, the fund incurred gross loss of Rs. 1,592 million, main contributors of which were dividend income of Rs. 52 million, capital loss of Rs. 75 million and revaluation loss of Rs. 1,572 million. After accounting for expenses of Rs. 35 million and element of income / capital gain on purchase and sale of units of Rs. 59 million, the fund recorded a net loss of Rs. 1,568 million for the quarter. The net assets of MIF decreased from Rs. 6,034 million at the beginning of the quarter to Rs. 4,320 million by the end of it, mainly due to decline in market value of investments.

During the quarter, units amounting to Rs. 537 million were issued and units amounting to Rs. 623 million were redeemed, resulting in net outflow of Rs. 86 million.

A New Initiative - Launching of the Islamic Index

The Karachi Stock Exchange (KSE) and Al Meezan Investments launched the first co-branded Islamic Index "KSE-Meezan Index (KMI)" on the 1st of Ramadan (September 2, 2008). The index

comprises of thirty companies which qualify KMI Shariah screening criteria and are weighted by float adjusted market capitalization subject to a 12% cap on weights of individual securities.

Investment Policy

The objective of MIF is to provide the maximum total return to the unit holders from investment in Shariah compliant investments for the given level of risk, while abiding by the "Non-Banking Finance Companies Rules, 2003" and "Non-Banking Finance Companies and Notified Entities Regulations, 2007", and any other prevailing rules and regulations. Total return refers to returns from capital gains, realized and unrealized, and dividend income (from investment in secondary and primary equities - Musharaka), rental income (from operating leases - Ijara), mark-up (from cost-plus sales - Murabaha), and other Shariah compliant investments.

Mutual Fund Rating

We are pleased to inform our investors that both the leading rating agencies operating in Pakistan, i.e. Pakistan Credit Rating Agency (PACRA) and JCR-VIS Credit Rating Company have assigned the highest possible rating for mutual funds to Meezan Islamic Fund. MIF has been rated 5-Star by both the rating agencies which denotes superior performance of MIF versus its peers. PACRA has awarded 5-Star rating to MIF for its superior short term (trailing 12 month period) and long term (trailing 36 month period) performance as compared to its peers. MIF is the only fund in the Islamic Fund category that has been rated 5-Star by JCR-VIS.

Future Outlook

Despite a challenging economic outlook, we are optimistic about the long term growth trend of the country and remain confident about the future prospects of the stock market in general and of Meezan Islamic Fund in particular. Going forward, it is expected that price floor mechanism would be removed along with the establishment of a stabilization fund, which will help to improve investor confidence.

Future direction of the market is likely to be driven by growth prospects, political stability, level of balance of payment and foreign investment in the country. We anticipate growing interest from foreign and local investors in the equity market as it is currently trading at a PE multiple discount of 25% as compared to the regional markets.

Acknowledgement

We take this opportunity to thank our valued investors for reposing faith in Al Meezan Investments and making it the largest Shariah compliant asset management company in Pakistan and for making MIF the largest open end equity fund in the private sector. We also thank the regulator, Securities and Exchange Commission of Pakistan, Meezan Islamic Fund's trustee, Central Depository Company of Pakistan and management of Karachi Stock Exchange for all their support and guidance. Last but not the least, we would like to place on record our gratitude for Justice (Retd.) Muhammad Taqi Usmani and other members of the Shariah Board of Meezan Bank for their continued guidance on Shariah aspects of fund management.

REPORT OF THE DIRECTORS OF THE MANAGEMENT COMPANY FOR THE QUARTER ENDED SEPTEMBER 30, 2008

The Board of Directors of Al Meezan Investment Management Ltd., the management company of Meezan Islamic Income Fund (MIIF) is pleased to present the un-audited financial statements of the fund for the quarter ended September 30, 2008.

Economic Review

The macroeconomic outlook remained bearish during the quarter as inflationary pressures mounted and current account deficit continued to widen unabated. The main reason for widening of the deficit was worsening of trade balance. Due to the extraordinary increase in international crude prices, which peaked at US\$ 147 per barrel in mid July, and hike in food prices, Pakistan's trade deficit for the first quarter FY09 reached US\$ 5.55 billion, an increase of 53% over the corresponding period. As a result, foreign exchange reserves declined from US\$ 11.1 billion in June 2008 to US\$ 8.1 billion at the end of the quarter. This created pressure on rupee against US dollar, which depreciated by 12% to close the quarter at Rs. 78.25.

The economy was further hurt by the uncertain political situation as foreign investors remained cautious during the quarter, resulting in a decline in foreign exchange reserves and foreign portfolio investment. However, the remittance inflows remained strong, with the first quarter FY09 figure totaling US \$ 1.88 billion, and provided some support to the balance of payment situation. On domestic front, Government of Pakistan remained ahead of its tax collection target in three months and collected Rs. 253 billion which also helped in providing some relief to the burgeoning government borrowing.

Money Market Review - Monetary Tightening

In order to curb inflation which hovered at around 25% for the quarter against 7% during the same period last year, State Bank of Pakistan (SBP) continued its policy of monetary tightening and increased the discount rate by 100 bps rate to 13% at the end of July 2008. The tight monetary stance resulted in six month T-bill rates to increase from 11.47% on June 30, 2008 to 12.68% by end of September 30, 2008, whereas 6 month KIBOR during the same period increased by 33 basis points closing at a record high of 14.52%. The high interest rate environment at the end of the quarter kept the money market gasping for breath, with overnight rates making new highs of over 40% as market participants felt the pinch of the liquidity crisis.

Despite continued assurance from the government to reduce its fiscal deficit, government borrowing from the SBP continued. In order to promote Islamic Banking industry and to tap other avenues to meet government expenditure, SBP also sold Rs. 6.5 billion worth of GOP Ijarah Sukuk with a pre-auction target of Rs. 10 billion. The coupon rate for the first six months was set at 13.13% (six month T-bill plus 45 bps). The following graph shows the trend in interest rate during the period:

Investment Policy

The Fund's primary objective is to provide investors with a high and stable rate of current income consistent with long-term preservation of capital in a Shariah compliant way. It provides potential to the investors to take advantage of opportunities to realize capital appreciation as well as regular income by investing in a diversified portfolio of long, medium and short term, high quality Islamic income instruments.

Mutual Fund Rating

We are pleased to inform our investors that JCR - VIS, the leading rating agency in Pakistan, has assigned an A(f) stability rating to MIIF, signaling moderate degree of stability in returns with risk factors considered variable if economic variables change.

Future Outlook

Going forward, we expect the central bank to relax its tight stance on the monetary policy. Increasing liquidity shortages in the banking sector and pressure in the foreign exchange market may lead to a cut in the CRR and SLR requirements for commercial and Islamic Banks. Foreign flow of funds in the economy might ease out the pressure in the inter bank rates as well. We expect 6-month KIBOR to remain above 14% for the upcoming months.

With increasing interest rates in the economy, we anticipate that the rate of return for MIIF will also go up as placements are made at higher rates and KIBOR linked coupons on floating rate Sukuks in the portfolio provide higher returns.

Acknowledgement

We take this opportunity to thank our valued investors for reposing faith in Al Meezan Investments and making it the largest Shariah compliant asset management firm in Pakistan and for making MIIF the largest open end fixed income fund in the private sector. We also thank the regulator, Securities and Exchange Commission of Pakistan, MIIF's trustee, Central Depository Company of Pakistan and management of Karachi Stock Exchange for all their support and guidance. Last but not the least; we would like to place on record our gratitude for Justice (Retd.) Muhammad Taqi Usmani and other members of the Shariah Board of Meezan Bank for their continued guidance on Shariah aspects of fund management.
