## Politics takes center stage

### Dear Investor,

KMI-30 and KSE-100 index both increased by 1.1% MoM in Mar-22, as the market remained largely on the negative side during most part of the month due to submission of no confidence vote in National Assembly and resignation of Punjab CM. However, the last week of the month saw a substantial rise as it became clear that opposition had garnered enough votes and there may be a smooth transition. The month witnessed some prominent developments such as delay in IMF review till formation of new government, drop in Current Account Deficit and fresh agreement over Reko Diq. Key events to watch out for during Apr-22 will be Supreme Court decision and its repercussions, Punjab CM election and Monetary Policy meeting.

During the month, the federal and provincial government of Balochistan have signed a new agreement with Barrick Gold Corporation of Canada for extraction of gold and copper reserves from Reko Diq with an investment of USD 10 billion. The new project will be owned 50% by Barrick Gold and the remaining 50% shareholding will be owned by Pakistan, divided equally between federal government and the provincial government of Balochistan. CPI numbers rose to 12.7% in March compared to 12.2% witnessed in the preceding month of February. Inflation rate came largely in line with market expectations. For the 9MFY22, CPI is up by 10.8% compared to 8.3% in the same period last year. The government has given a temporary relief by reducing petrol and diesel prices as well power tariff. Once this relief is removed, it will further translate into inflation numbers in the next few months. Pakistan's current account deficit after widening by USD 2.6 billion in January 2022 saw a sharp drop to USD 0.55 billion for February 2022 in the wake of absence of one-off other import and 16% MoM rise in exports. CAD is down 78% MoM in Feb-22. Despite the massive reduction in February, Pakistan's current account deficit has ballooned to USD 12.1 billion in the 8MFY22, compared to a surplus of USD 1.0 billion during 8MFY21. FBR has collected net revenue of Rs. 4,382 billion (up 29% YoY) during 9MFY22 against the assigned target of Rs. 4,134 billion, showing an increase of Rs. 248 billion.

### Political uncertainty has compounded economic challenges

With political environment in a state of flux, a key casualty of this uncertainty has been the economy. Amid high commodity prices we have seen populist measures of giving subsidy on fuel and electricity which is unsustainable, and led to impasse with IMF. The ongoing talks with the IMF under seventh review of the Extended Fund Facility programme would now remain pending till the formation of new government. This has further delayed the issuance of international bonds which was essential in preserving the falling foreign exchange reserves, resulting in further rupee devaluation and spike in fixed income yields. Tough measures to address structural flaws are needed to be taken, which will occur as soon as political uncertainty ends, which the market will take as a positive sign. Nonetheless, under the current elevated commodity cycle, Pakistan's economy is expected to remain under pressure in short term while the market P/E remains at extremely attractive level of 4.6x compared to its long-term average P/E of 8.3x.

## Stock Market Review

During the month of March 2022, KSE-100 index went up by 468 points (up 1.05%) to close at 44,929 points. The average daily volume of the market stood at 206 mn, down by 9% on MoM basis. Technology, Fertilizer and Chemical were the major positive contributors to the Index performance.

The month started on a negative note due to rising commodity prices and political uncertainty as opposition parties submitted vote of no confidence against the prime minister however market recovered sharply during the last week of the month due to slightly easing off commodity prices from the peak, unexpected drop in current account deficit and expectation of smooth transition of power as opposition were able to accumulate enough vote.

Foreigners were net seller with net selling aggregating USD 23 mn during the month and on local front Mutual Funds were major seller with net selling aggregating USD 9 mn while Banks and Individuals were major buyer with net buying aggregating USD 15 mn and USD 9 mn respectively. The oil prices increased by 6.85% during the month with Brent closing at USD 107.91/barrel.

While near term volatility cannot be ruled out, we continue to maintain a long term positive outlook on equity market. We encourage investors to enhance their long-term exposures to the equities at these levels.

### KSE-100 Index Performance
