Stock Market Set To Shine in 2018 As Investors Regain Their Lost Confidence

Dear Investor,

Pakistan Stock Exchange witnessed a happening 2017, as the first half of the year embraced optimism on account of inclusion of Pakistan in MSCI Emerging Markets Index, while the latter half was shaken by deteriorating sentiment on the back of political noise. Despite providing a negative return of 15% for the year, the market recorded a strong pull back during the second half of December, in which it registered a 6.7% gain from its lowest level in 16 months of 37,919 pts reached on December 19, 2017. This much needed rally helped the benchmark index, KMI - 30, to close at 68,612 pts and KSE - 100 to close at 40,471 pts, up by 0.75% and 1.15% for the month.

As the year drew to a close, major positive indicators were witnessed that primarily fueled the rally. A significant development came on account of passing of delimitation bill by the Supreme Court, which has improved the prospects for timely elections. Appointment of Mr. Miftah Ismail as Adviser to the Prime Minister on Finance further eased the political noise and were perceived positively by the market.

Going forward, we expect the momentum that picked up recently to continue. The aforementioned political developments have considerably diluted the long prevailing uncertainty. Moreover, an interesting historical trend depicts that Pakistan Equities have always rallied in the run up to and post elections. In this respect, we foresee history to repeat itself in 2018 as well and expect the market to rebound from hereon after a seven month corrective streak, longest seen in over two decades. Prospective returns for the next six months are reflected in the illustration below.

In light of the above, we believe that Pakistan's Stock Market will be perceived with a fresh perspective going into 2018. Fundamentally, the index is trading at a forward P/E of around 8x, which is lower than the historic 10 year average. Moreover, our market's discount to MSCI Emerging Markets Asia has widened to about 50%, as compared to the last 10 year average of 25%.

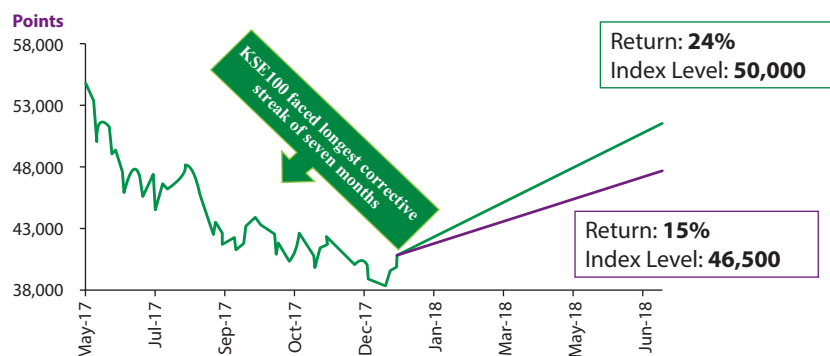

Current valuations clearly depict the attractiveness of our index. While foreigners were net sellers in CY17 to the tune of USD 487 mn, they are now poised to re - enter PSX especially in the wake of much awaited PKR depreciation that occurred during the month, and due to fresh buying that will occur on account of MSCI rebalancing. On the economic front, the growth momentum is expected to continue in 2018 as GDP growth is likely to clock in near 6% for FY18. This along with the timely materialization of CPEC energy / infrastructure projects will lead to a further uptick in economic activity.

In light of the strong investment case for Pakistan due to its strong fundamentals, attractive valuation and lucrative dividend yields, we encourage our investors to revisit the market and utilize this ideal entry point. While short term volatility could be witnessed in the run up to General elections, political situation should be much clearer in the months to come, which is why we would advise our investors to remain optimistic on the market.

Investors having various risk profiles and investment horizons are advised to go through our Fund Manager Report hereunder for a detailed performance review of our mutual funds, which would serve as a useful tool in selecting a scheme for investment according to their risk preference.

Market Triggers for 2018

- Attractive Valuations as discount has widened to regional peers
- Passing of delimitation bill has improved prospects for timely elections
- Historical trend of bullish run prior to elections
- CPEC to stimulate economic activity
- Seven month corrective streak, longest in over two decades

Stock Market Review

During the month of December 2017, the KSE-100 index was up by 1.15% to close at 40,471 points. Exploration & Production, Fertilizer and Banks were major positive contributors to the index. The average daily volume of the market was 151.37mn, up by 140.6% on a MoM basis.

Foreigners reported a net sell of USD 4.3mn in December, while Companies and Mutual Funds were major buyers with reported figure of USD 19.8mn and USD 18.3mn respectively. Unsettled politics continued to influence investment decisions as local investors preferred to wait for signs of normalcy to return. Approval of delimitation bill laid to rest any concerns investors had regarding a delay in Elections. This was further augmented by PM formally announcing date of general elections to be held in July 2018. Rising oil prices continued to keep interest alive in the Oil and Gas sector, which was one of the best performing sectors this month. Oil prices were higher by 7.27% at the end of the month with Brent closing at USD 66.87/barrel owing to unrest in the Middle East as well as due to damage to Oil Pipelines in the North Sea and Iran.

We reiterate our previously communicated stance, and urge investors to look at current levels as an opportunity.

KSE-100 Index Performance

Money Market Review

The money market faced a relatively tight liquidity scenario evidenced by Rs. 5.513 trillion worth of OMO injections carried out by the SBP coupled with Rs. 150bn worth of discounting. The 6MK and 12MK both closed 2bps up at 6.21% and 6.50% respectively. The 3-month and 6-month T-bill yields were up by 3bps and 1bp at 6.01% and 6.02%. PIB rates showed a sharp increase during the month whereby 3 year, 5 year and 10 year PIB yields were up by 33bps, 27bps and 9bps respectively.

Inflation for the month of December 2017 clocked in at 4.57% as compared to 4.97% in November 2017; however, the 6MFY18 average CPI clocked in at 3.77%, still well below the SBP target of 6%. During the month of December, two T-bill auctions were conducted during the month whereby in total Rs. 697 billion was accepted against the participation of Rs. 810 billion with major participation and acceptance in 3 months category (in line with the monetary tightening anticipation in the secondary market). A PIB auction was also conducted in which total participation remained thin at Rs. 6.12 bn against a target of Rs. 50 bn with major participation in 3 year category. However, no bid was accepted by SBP in this PIB auction.

On the forex front, the rupee in interbank market closed Rs. 4.94 weaker at Rs. 110.42/\$ while in the open market, it closed Rs. 3.35 weaker at Rs. 110.95/\$ during the month.
