From the CIO's Desk

CIO Note: November 2020 Covid-19 vaccine success improves outlook

Dear Investor,

KMI-30 index increased by 4.4% MoM while KSE-100 index improved by a lower 3.0% in November-20, as the market witnessed volatility during most part of the month while rise was seen mainly in the last week of the month due to resurgence in global oil prices. Overall during the 5MFY21, KMI-30 is up by 20.6%. The month witnessed some prominent developments such as vaccine related breakthroughs by different pharmaceutical companies, fourth consecutive month of current account surplus for October, continued rise in political temperature and status quo decision of policy rate.

The market remained volatile during the month due to heightened political noise of opposition gatherings in different cities. Active cases of corona virus have seen an acceleration in Pakistan from 12,592 at October end to 49,105 at November end, while infection ratio has also risen to around 7%. While cases are on the rise, the government has assured that industries will not be closed, which allayed concerns of investors. The market did eventually recover during the last week led by index heavy weight Oil E&P companies on the back of improvement in international oil price. Oil price rose by a substantial 27% during the month of November with Brent crude closing the month at USD 47.6 per barrel, rising to highest level since March-20 on the back vaccine breakthrough news. MSCI World Index also rose by 13% in November while MSCI Emerging Market Index increased by 9%. Market activity dropped during November with average daily volumes of KSE-100 index decreasing by 39% MoM to 161 mn shares. Foreigners recorded a net outflow of USD 48 mn during Nov-20 and on the local front, Mutual Funds were net sellers of USD 11 mn. On the other hand, Individuals, Insurance & Companies were major net buyers during the month of USD 34 mn, USD 13 mn and USD 11mn, respectively.

On the economic front, CPI numbers for the month of November came in above expectation at 8.3% compared to 8.9% in the preceding month of October. Overall, the MoM rise of 0.8% in CPI was mainly due to rise in food items while other heads continue to remain in control. Average national inflation for 5MFY21 was recorded at 8.8% YoY compared to 10.8% witnessed during same period last year. SBP still projects average inflation to remain in the range of 7-9% during FY21. In the latest policy meeting, given the broadly unchanged outlook for growth and inflation, the MPC viewed the existing stance of monetary policy as appropriate to support the nascent recovery while keeping inflation expectations well-anchored and maintaining financial stability. During 5MFY21, FBR provisionally collected Rs.1.69 trillion against the target of Rs.1.67 trillion, while YoY growth stood at 4%. The external account continued to improve substantially with Current account in surplus for 4MFY21 of USD 1.16 billion versus Current account deficit of USD 1.42 billion during 4MFY20. This improvement is attributable to 3% YoY reduction in trade & goods deficit, and a substantial 27% YoY rise in remittances. SBP's foreign exchange reserves improved to USD 13.1 billion as of 27th November, up 8% from USD 12.2 billion at the end of October 2020.

Improving economic growth prospects and vaccine roll out support buoyant stance

The positive measures taken by the government of stimulus and central bank of drastic cut in interest rates along with other measures has enabled a quick recovery in FY21. The market has shown a good recovery during 5MFY21, and is up by a decent 19.3% for KSE-100 index, while KMI-30 index has risen by 20.6%. Despite the rise, market is still trading at an attractive P/E level of 6.8x while offering a dividend yield of 4.3%. When compared with MSCI EM P/E of 18.6x, the discount is much higher than average historical discount. With the coronavirus vaccines expected to roll out in the coming months, concern over pandemic is likely to reduce while improvement in economic activity is likely to accelerate globally as well as locally in the medium term.

Stock Market Review

During the month of November 2020, benchmark KSE-100 index went up by 1,181 points (up 3%) to close at 41,069 points. The average daily volume of the market stood at 283 mn, down by 30% on MoM basis. Oil & Gas Exploration Companies, Banks and Technology were the major positive contributors to the Index performance.

Major reasons behind the increase in the benchmark index were the major progress in the development of COVID-19 vaccine, Joe Biden's Presidential win in the US election and PM Khan's assurance to not close down businesses in the second wave of Covid-19.

Foreigners were net seller with net selling aggregating USD 48 mn during the month while on local front Individuals, Insurance Companies and Companies were major buyer with net buying aggregating USD 34 mn, USD 13 mn and USD 11 mn respectively. The oil prices increased by 27% during the month with Brent closing at USD 47.59/barrel on the news of potential COVID-19 vaccine.

While near term volatility cannot be ruled out, we continue to maintain a long-term positive outlook on equity market. We encourage investors to enhance their long-term exposures to the equities at these levels.

KSE-100 Index Performance

Money Market Review
