From the CIO's Desk

Stable PKR, falling CAD and lower bond yields are key triggers for market

Dear Investor,

The KSE100 index recorded first positive monthly close after Jan'19, posting a gain of 2,407 points translating into 8.1% return (8.5% return in USD terms) for the month.

The index commenced on a positive note after issuance of GIDC amendment Ordinance in last week of Aug'19, though some jitters came after the ordinance was withdrawn within a week. The decline witnessed in secondary market PIB yields strengthened the view that interest rate cycle has peaked and supported positive sentiment. The currency remained stable with REER for Aug'19 coming at 92.7. Prime Minister's successful trip to US where he held meetings with investors, businessmen and political leadership of various countries on the sideline of UNGA summit was also viewed positively.

The volumes sustained elevated levels, with KSE-100 total volumes averaged 89.5mn up 3.9% m/m. The foreign portfolio investors were net sellers of USD 3.5mn during the month while locally Insurance, Companies and Mutual funds aggregately reduced their exposures by USD 26.7mn. On sectoral basis the index gain was led by E&Ps, Banks, Fertilizer, OMCs, Power Generation whereas Autos, Cement and Tobacco were negative contributors.

The current account deficit (CAD) for Aug'19 witnessed a decline of 15% y/y to USD 614mn on the back of 36% drop witnessed in trade deficit. For 2MFY20, CAD was down 55% y/y to USD 1,292mn led by 40% fall in trade deficit. The inflation for Aug'19 came in at 10.5% (base year 2015-16) while the SBP maintained policy rate at 13.25%

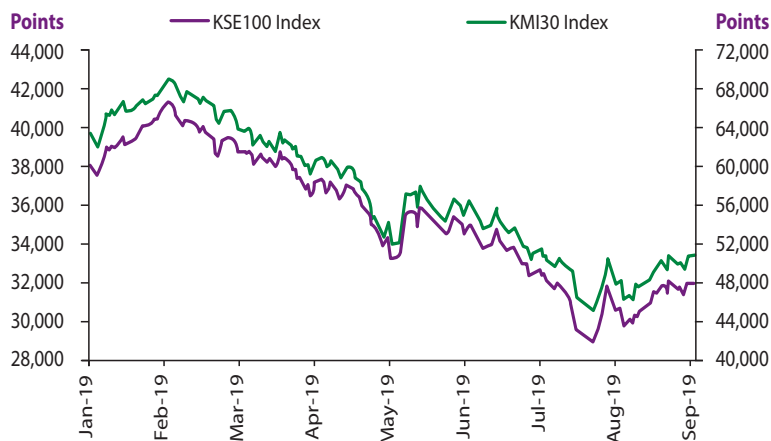

in Sep'19 meeting. This was the first pause in monetary tightening after eight consecutive hikes. Reportedly, the circular debt run rate slowed to PKR18bn per month in Jul'19 from over PKR 38bn for 1HFY19 due to increase in power tariffs, change in energy mix towards hydel and technical and system improvement measures taken by the govt.

On the other hand remittances registered a decline of 19% y/y in Aug'19 to USD 1,691mn. During 2MFY20, remittances are down 8% y/y to USD 3,730mn. Foreign direct investment (FDI) dipped by 58% y/y to USD 83mn while large scale manufacturing (LSM) witnessed a decline of 3.3% y/y in Jul'19.

IMF team came on a visit to Pakistan during the month. IMF praised Pakistan's progress on macro reforms in its consultative meetings however stated that there is no plan to change the targets as the program has commenced merely three months ago.

Stability in Pak Rupee, ~14% y/y jump in tax collection (provisional) despite economic slowdown, notable foreign flows in debt market, lower secondary market yields and steep drop in current account deficit are likely to maintain investor's upbeat sentiment going forward.

The KSE-100 index is currently trading at a PER of 5.9x (FY20) compared to MSCI EM Index PE of 12.9x and offering an alluring DY of ~7.8% versus ~3.1% offered by the region.

Stock Market Review

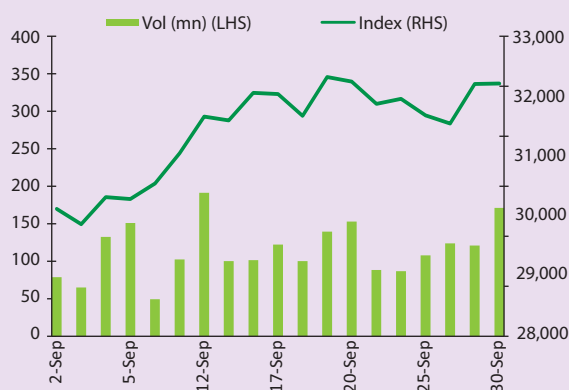

During the month of September 2019, benchmark KSE-100 index went up by 2,407 points (up 8.10%) to close at 32,079 points. The average daily volume of the market stood at 114.5 mn, up by 1.5% on MoM basis. Oil & Gas Exploration Companies, Commercial Banks, Fertilizer and Oil & Gas Marketing Companies were the major positive contributors to the Index performance.

Major reasons behind the outperformance of the benchmark index were the substantial decline in current account deficit, stability in the currency, significant drop in PIB yields (inverted yield curve), notable foreign flows in debt market and surge in oil prices post attack on major oil and gas facilities in the Kingdom of Saudi Arabia (KSA). Moreover, the SBP in its latest MPS has kept the interest rates unchanged, which indicates that the interest rates have peaked out and are expected to go down in the 2nd half of current fiscal year.

Foreigners were net seller with net selling aggregating USD 3.53 mn during the month and on local front Insurance Companies were major seller with net selling aggregating USD 15.57 mn while Other Organizations were major buyer with net buying aggregating USD 13.33 mn. The oil prices slightly increased by 0.58% during the month with Brent closing at USD 60.78/barrel due to tensions between Iran and Saudi Arabia post attack on the Saudi Aramco facility.

While near term volatility cannot be ruled out, we continue to maintain a long term positive outlook on equity market. We encourage investors to enhance their long-term exposures to the equities at these levels.
