CIO Note: September 2023

Stock market rises amid PKR appreciation and status quo in policy rate

Dear Investor,

KMI-30 index improved by 3.6% while the KSE-100 index also increased by 2.7% after posting a loss in Aug-23. Overall during 1QFY24, the KMI-30 index is up by 9.8%. The crackdown on currency speculation enabled the PKR to improve versus the USD. This in turn emboldened the SBP to resist increasing interest rates in the September monetary policy meeting, against the market expectations of a policy rate hike. Moreover, the ECP also announced that the general elections will be held in the last week of Jan-24 which further boosted investor confidence. Key events to watch in Oct-23 will be gas tariff hike, MPC meeting, any development to attract foreign investment, and election-related political developments.

The crackdown on currency speculation enabled the PKR to improve by 6% MoM versus the USD in Sep-23. PKR had initially plunged to an all-time low of 307 during the month amid political uncertainty and a widening current account deficit, but gradually recovered to close the quarter at PKR 287.7/USD, down by only 0.6% QoQ. It must be noted that SBP foreign exchange reserves are still far from comfortable, standing at USD 7.6 billion as of September 22, barely enough to cover two months of imports. The interim government has promised steadfast implementation of the policy actions committed under the SBA with IMF during the tenure of the caretaker government to ensure economic stability. Oil prices remained strong, rising by 10% during the month with Brent oil closing at USD 95.3/barrel as additional cuts by Saudi Arabia and Russia took hold.

On the economic front, CPI-based inflation increased to 31.4% in Sep-23 compared to an increase of 27.4% in the previous month. On MoM basis, it rose by 2.0%, with the main rise emanating from Fuel, selected Food items and Health related items. Core inflation for the month of Sep-23 stood at 22.1%. Overall 1QFY24 CPI has clocked in at 29.0% compared to 25.1% in the same period last year. However, the deceleration has continued when compared to the 4QFY23 reading of 34.6%. Despite the MoM rise in various items, the CPI for Oct-23 is expected to slow down to nearly 28%. As against the market expectations, the Monetary Policy Committee (MPC) of the SBP has maintained the key policy rate at 22% during its mid-September-23 meeting as inflation is projected to remain on a downward trajectory in the future. The Current Account Deficit (CAD) moderated to a more manageable USD 0.9 billion during 2MFY24, down from USD 2.0 billion during the same period last year. While exports declined by 8% YoY to USD 4.5 billion, imports contracted more sharply by 26% YoY to USD 8.5 billion. During 2MFY24, FBR collected Rs 2.0 trn showing a growth of 24% when compared with last year's collection of Rs 1.6 trn.

Resilient corporate earnings amid tough economic conditions

Despite tough economic conditions, multi-decade high inflation reading in FY23, Balance of Payment issues and lower demand across major sectors, the profitability of the KSE-100 index improved, posting a decent growth of around 20% YoY in FY23. On a sequential basis, KSE-100 index earnings posted a QoQ decline during 4QFY23 due to the absence of exchange gain and the imposition of additional super tax. Key listed sectors continuing to show YoY earnings growth during FY23 were Bank, E&P, Cement and Foods, while negative growth was witnessed in Autos, OMCs, Power and Pharmaceutical sectors. Valuations continue to remain very attractive, by historical averages, with the market trading at a forward P/E ratio of around 3.7x compared to its long-term average P/E of about 7.9x and promising a handsome dividend yield of 8.3%, while selected blue chips are offering dividend yield in excess of 15%.

Advice for investors: Investors looking to invest for shorter tenors and low to medium risk are advised to invest in our Money Market and Income Funds given high-interest rates. Investors with a high-risk appetite and long-term view should continue to enhance long-term exposures to the equities at these levels as economic conditions will continue to gradually improve as the forex reserve situation improves and the election roadmap is finalized.

Stock Market Review

During the month of September 2023, the KSE-100 index went up by 1,230 points (up 2.73%) to close at 46,233 points. The average daily volume of the market stood at 160 mn shares, down by 46% on a MoM basis. Power Generation, E & P's and Cement were the major positive contributing sectors to the Index performance.

The major reason behind the increase in the stock market performance was the PKR appreciation against USD due to the crackdown against the foreign currency smuggling. Moreover, the SBP in its last MPS has maintained the status quo in the policy rate as against the market expectations of policy rate hike. Additionally, the ECP announced that the general elections in the country would be held in the last week of January 2024, further boosting investor confidence.

Foreigners were net sellers with net selling aggregating USD 9 mn during the month and on local front, Banks were major sellers with net selling aggregating USD 16 mn while Individuals, Other Organizations and Insurance Companies were major buyers with net buying aggregating USD 10 mn, USD 7 mn and USD 6 mn respectively. The oil prices increased by 9.7% during the month with Brent closing at USD 95.31/barrel.

While near-term volatility cannot be ruled out, we maintain a long-term positive outlook on the equity market. We encourage investors to enhance their long-term exposures to equities at these levels.

KSE - 100 Index Performance
