#### **Economic Review**

At the beginning of Fiscal Year 2024, Pakistan successfully negotiated with the IMF a nine-month SBA program of USD 3 billion. The agreement led to the disbursement of IMF's first tranche from the SBA, in addition to unlocking external assistance from other lenders, which led to the State Bank of Pakistan's (SBP) reserves rising by USD 3.2 billion to USD 7.6 billion as of Sept 28, 2023.

During the quarter, the headline inflation remained at 29% as compared to 35% during the previous quarter on the back of high base-effect and moderating food inflation. As a result, the SBP kept the policy rate unchanged at 22% during the quarter. The central bank also took a cue from recovery in agricultural production which can further help in reducing food inflation in the coming months.

On the external front, the Current Account Deficit (CAD) moderated to a more manageable USD 0.9 billion during 2MFY24, down from USD 2.0 billion during the same period last year. While exports declined by 8% YoY to USD 4.5 billion, imports contracted more sharply by 26% YoY to USD 8.5 billion. Key reasons for the reduction in imports were significantly slower economic activity and import restrictions. Hence the trade deficit contracted by 39% YoY to USD 3.9 billion, from USD 6.5 billion during the same period last year. Worker remittances declined by 22% YoY to USD 4.1 billion during 2MFY24 as the wide difference between the open market and interbank exchange rate diverted inflows towards informal channels. The supply constraints due to import controls continued to reflect in the lower Large-Scale Manufacturing growth trend, which was down 1% YoY in July 2023.

The quarter witnessed a volatile trend in PKR movement against the USD. While the PKR initially strengthened post-SBA agreement with the IMF, concerns over the impact of normalization of imports and higher global oil prices kept the PKR appreciation short-lived. Subsequent to that, PKR witnessed a sharp plunge against USD, depreciating by as much as 7% to its new low marked at 307 in early September. However, swift action towards reforms that pertained to foreign exchange companies and crackdown against illegal currency transactions, arrested the sharp decline in the later part of the quarter, leading to a quick recovery in the PKR/USD exchange rate, which ultimately closed at 287.7, down 0.6% during the quarter.

#### **Money Market Review**

During the first quarter of the fiscal year 2024, the central bank kept the policy rate unchanged and as per SBP estimate in the last MPS, the declining trend in inflation will continue in the coming quarters. On the liquidity front, the money market remained stable due to regular short- and medium-term Open Market Operations (OMO) by the SBP, which is why the rates remained below the discount rate.

The table below summarizes the changes in fixed-income instrument yields;

In the market for Shariah-compliant instruments, GoP Ijarah prices showed a mixed trend, whereby shorttenor Ijarah prices increased due to increased demand while longer-tenor Ijarah prices showed a slight decline in prices. The central bank continued to conduct GoP Ijarah Sukuk auctions during the period as new assets were also added to tap excess liquidity from the market. During the quarter, the central bank borrowed Rs. 276 billion, 197 billion and 185 billion in 5 years, 3 years and 1 year Ijarah auctions. The corporate sector continued facing challenges in raising money through long-tenor Sukuk; however, an increase has been seen in the issuance of shorter-tenor corporate instruments during the period under review.

The table below summarizes the details of Ijarah/Sukuk:

#### **Equity Review**

During the first quarter of FY24, the equity market remained on a positive trend with the KMI-30 index increasing by 10% to close at 77,669 points, the strongest quarterly performance by the index since the first quarter of FY21 (the market touched its six-year high level). The KSE-100 index during the same period also rallied by 12% to close at 46,233 points. This was led majorly by the commencement of a new IMF program which drove market expectations for greater macroeconomic stability until the next general elections are held and a new government negotiates a new longer-term program with the IMF. In light of the ensuing improvement in the macroeconomic outlook, the global credit rating agency Fitch upgraded Pakistan to 'CCC' in July 2023. The period also marked the end of term for the PDM-led government by mid-August and handing over the government to a caretaker setup, dominated by technocrats. Corporate results for the April-June quarter, which also marked the end of the fiscal year for several non-financial companies, broadly saw profitability holding up for the cyclical sectors despite a very tough macroeconomic backdrop. Meanwhile, payouts from non-cyclical sectors, especially in the energy chain and banking sector, exceeded market expectations.

The rebound in investors' confidence was also reflected in higher participation during the quarter as KSE100 Index volumes jumped by 100% QoQ with an average daily volume of 143 million shares while the KMI 30 average daily volumes also improved by 83% QoQ to 85 million shares during the quarter.

The KMI-30 index made a high of 81,758 points during the quarter (rising 16%), while the KSE-100 index peaked at 48,765 (an 18% increase from the beginning of the quarter). After staging a peak in early August, the KSE100 index saw a correction because of some macroeconomic concerns especially with the current account balance turning into a large deficit of USD 0.8 billion in July after four consecutive months of surplus. Nonetheless, the index's recovery towards the end of the quarter due to a government crackdown on currency speculation enabled the PKR to stabilize by the end of September.

On the global front, the US Federal Reserve kept the interest rate at a 22-year high of 5.25%-5.50% in its September 2023 meeting, following a 25bps hike in July, and in line with market expectations, but hinted that there could be another hike before the end of the year and rates are likely to stay 'higher for longer' as the Fed wants to completely root out inflation before cutting rates again. The Fed's decision and guidance led to a lacklustre market performance by the global equity markets in the first quarter of FY24 with the MSCI World Index declining by 4%. Emerging markets have also continued to underperform, with the MSCI Emerging Markets Index having declined by 4% during the quarter

#### Outlook

After witnessing a turbulent year marred by political and economic crises during FY23, the IMF expects GDP growth of 2.5% for Pakistan in FY24, as the focus shifts from stabilization to growth. Political uncertainty can be expected to taper off post-culmination of general elections. On the monetary side, the combined impact of 1) high base effect, and 2) expected PKR stability can keep inflation in check. However, continued engagement with the IMF will likely keep interest rates sticky for the most part of FY24. Furthermore, while the IMF SBA can be expected to lessen the liquidity woes of the country in the near term, the next elected government would nonetheless have to re-engage with the Fund for another longer-tenor program. On the fixed-income side, Sukuk issuances are expected to continue as the government is committed to increasing the share of Islamic sources of finance.

The interim government has promised steadfast implementation of the policy actions committed under the SBA with IMF during the tenure of the caretaker government to ensure economic stability. Special Investment Facilitation Council (SIFC), has been formed to attract substantial investments of USD10-25 bn from friendly countries. Going forward, economic and political challenges will remain so the stock market is expected to remain volatile in the short term but gradual clarity on much-needed economic reforms is likely to act as a key trigger along with a timely election as a new government with a fresh mandate will have ample time for structural reforms. Historical data shows that the performance of PSX is closely intertwined with the external account prospects of the country. When the external account prospects improve, the market provides good returns in the subsequent years. Corporate earnings are expected to grow by around 15% during FY24, while valuations continue to remain very attractive, by historical averages, with the market trading at a forward P/E ratio of around 3.7x compared to its long-term average P/E of about 7.9x and promising a handsome dividend yield of 8.3%, while selected blue chips are offering dividend yield in excess of 15%.

## اقتصادى جائزه

مالی سال 2024 کے آغاز میں، پاکستان نے IMF کے ساتھ 3ارب امریکی ڈالر کے نوماہ کے BBA پروگرام کے لیے کامیاب مذاکرات کیے۔اس معاہدے کے نتیج میں ایس بی اے سے آئی ایم ایف کی پہلی قسط کے اجراکے علاوہ دیگر بیرونی قرضوں کا حصول ممکن ہوا، جس کی وجہ سے بینک دولت پاکستان (ایس بی پی) کے ذخائر 28 ستمبر 2023 تک 3.2 ارب امریکی ڈالرسے بڑھ کر 7.6 ارب امریکی ڈالرتک پہنچ گئے۔

سہ ماہی کے دوران، ہیڈ لائن افراطِ زر29 فیصدر ہی جو کہ گزشتہ سہ ماہی کے دوران35 فیصدتھی ،اس کمی کی وجہ گزشتہ سال کےاسی عرصے کے دوران افراطِ زرکی شرح کا بلندر ہنا اور غذائی افراط زر میں اعتدال تھا۔ نیتجناً،اسٹیٹ بینک نے سہ ماہی کے دوران پالیسی ریٹ کو 22 فیصد پر برقر اررکھا۔مرکزی بینک نے زرعی پیداوار میں بحالی کوبھی مدِنظر رکھا، جس سے آنے والے مہینوں میں غذائی افراط زرکوکم کرنے میں مزید مدول سکتی ہے۔

سہ ماہی میں امریکی ڈالر کے مقابلے میں پاکستانی روپے کی قدر میں اتار چڑھاؤ کار بحان دیکھا گیا۔ جب کہ PKR ابتدائی طور پرIMF کے ساتھ SBA معاہدے کے بعد مضبوط ہوا، تاہم درآمدات کے معمول پرآنے کے اثرات اور عالمی سطح پرتیل کی بلند قیمتوں کے خدشات نے PKR کی قدر میں بحالی کے ربحان کومحد ودر کھا۔ بعد ازاں، امریک ڈالر کے مقابلے میں پاکستانی روپے کی قدر میں تیزی سے کی دیکھی گئی، اور تنبر کے اوائل میں 7 فی صد تک کی کی کے بعد ڈالر کے مقابلے میں روپیہ 307 کی نئی کم ترین سطح آگیا۔ تاہم، غیر ملکی زرمباد لہ کمپنیوں سے متعلق اصلاحات اور غیر قانونی کرنسی کے لین دین کے خلاف کر یک ڈاؤن کی جانب تیزی سے کارروائی نے سہ ماہی کے آخر میں تیزی سے گراوٹ کوروک دیا، جس کے نتیج میں PKR کی شرح تباد لہ تیزی سے بحال ہوئی اور سہ ماہی کے دوران 6.0 فیصد کم ہوکر بالآخر 2877 پر بند ہوئی۔

مالی سال2024 کی پہلی سہ ماہی کے دوران، مرکز ی بینک نے پالیسی ریٹ میں کوئی تبریلی نہیں کی اور آخری مالیاتی پالیسی بیان میں بینک دولت پاکستان کے اندازے کے مطابق، آنے والی سہ ماہیوں میں مہنگائی میں کمی کار جحان جاری رہے گا۔سیالیت کےمحاذ پر، اسٹیٹ بینک کی جانب سے با قاعدہ مختصراور درمیانی مدت کے او پن مارکیٹ آ پریشنز (اوا یم او) کی وجہ سے کرنی مارکیٹ متحکم رہی، یہی وجہ ہے کہ شرحیں، ڈ سکاؤنٹ ریٹ سے نیچ رہیں۔

ینچ دی گئی جدول فکسڈ انکم انسٹر ومنٹ پر شرحِ منافع میں ہونے والی تبدیلیوں کا خلاصہ کرتی ہے۔

شرعی اصولوں کے مطابق انسٹر ومنٹس کی مارکیٹ میں GoP اجارہ کی قیمتوں میں ملاجلار بحان دیکھا گیا، جس کے تحت قلیل مدتی اجارہ کی قیمتوں میں مانگ میں اضافہ کی وجہ سے اضافہ ہوا جبکہ طویل مدتی اجارہ کی قیمتوں میں معمولی کمی واقع ہوئی۔ مرکزی بینک نے اس عرصے کے دوران GoP اجارہ سکوک کی نیلامی جاری رکھی کیونکہ مارکیٹ سے اضافی سیالیت کوجذب کرنے کے لیے نئے اثاثے بھی شامل کیے گئے۔ سہ ماہی کے دوران ، مرکزی بینک نے 5 سال ، 3 سال اور 1 سال کے اجارہ کی نیلامی میں 20 ارب سیالیت کوجذب کرنے کے لیے نئے اثاثے بھی شامل کیے گئے۔ سہ ماہی کے دوران ، مرکزی بینک نے 5 سال ، 3 سال اور 1 سال کے اجارہ کی نیلامی میں 20 ارب ارب اور 1855 ارب روپے قرض لیا۔ کارپوریٹ سیکٹر کوطویل مدتی سکوک کے ذریعے پیدا کٹھا کرنے میں مسلسل چیلنجز کا سامن کرنا پڑا۔ تاہم ، زیر جائزہ مدت کے دوران مختصر مدت کے کارپوریٹ انسٹر ومنٹس کے اجراء میں اضافہ دیکھا گیا ہے۔

This practice is being followed to comply with the requirements of the accounting and reporting standards as applicable in Pakistan.

#### 3. BASIS OF PREPARATION

#### 3.1 Statement of compliance

These condensed interim financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan for interim financial reporting. The accounting and reporting standards applicable in Pakistan for interim financial reporting comprise of:

- International Accounting Standard (IAS) 34, Interim Financial Reporting, issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017;
- Provisions of and directives issued under the Companies Act, 2017, along with part VIIIA of the repealed Companies Ordinance, 1984; and

the Non-Banking Finance Companies (Establishment and Regulation) Rules, 2003 (the NBFC Rules), the Non-Banking
Finance Companies and Notified Entities Regulations, 2008 (the NBFC Regulations) and the requirements of the Trust Deed.

Where provisions of and directives issued under the Companies Act, 2017, part VIIIA of the repealed Companies Ordinance 1984, the NBFC Rules, the NBFC Regulations and the requirements of the Trust Deed differ from the International Accounting Standard (IAS) 34, Interim Financial Reporting, the provisions of and directives issued under the Companies Act, 2017, part VIIIA of the repealed Companies Ordinance 1984, the NBFC Rules, the NBFC Regulations and the requirements of the Trust Deed have been followed.

The disclosures made in these condensed interim financial statements are limited based on the requirements of the International Accounting Standard 34: 'Interim Financial Reporting'. These condensed interim financial statements do not include all the information and disclosures required in a full set of financial statements and should be read in conjunction with the annual published audited financial statements of the Fund for the year ended June 30, 2023.

These condensed interim financial statements are unaudited. However, in compliance with Schedule V of the NBFC Regulations, the directors of the Management Company declare that these condensed interim financial statements give a true and fair view of the state of affairs of the Fund as at September 30, 2023.

### 4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, ACCOUNTING ESTIMATES, JUDGEMENTS AND RISK MANAGEMENT POLICIES

- 4.1 The accounting policies adopted and the methods of computation of balances used in the preparation of these condensed interim financial statements are the same as those applied in the preparation of the annual financial statements of the Fund for the year ended June 30, 2023.
- 4.2 The preparation of the condensed interim financial statements in conformity with accounting and reporting standards as applicable in Pakistan requires management to make estimates, assumptions and use judgments that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. Estimates, assumptions and judgments are continually evaluated and are based on historical experience and other factors, including reasonable expectations of future events. Revisions to accounting estimates are recognised prospectively commencing from the period of revision. In preparing the condensed interim financial statements, the significant judgments made by management in applying the Fund's accounting policies and the key sources of estimation and uncertainty were the same as those applied to the financial statements as at and for the year ended June 30, 2022. The Fund's financial risk management objectives and policies are consistent with those disclosed in the annual financial statements of the Fund for the year ended June 30, 2023.

There are certain amendments to the published accounting and reporting standards that are mandatory for the Fund's annual accounting period beginning on July 1, 2023. However, these do not have any significant impact on the Fund's operations and, therefore, have not been detailed in these condensed interim financial statements.

#### 12. TAXATION

The income of the Fund is exempt from income tax under Clause 99 of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. Since, the management has distributed the required minimum percentage of income earned by the Fund for the quarter ended September 30, 2023 to the unit holders, therefore no provision for taxation has been made in these condensed interim financial statements.

The Fund is also exempt from the provisions of Section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

#### 13. FAIR VALUE MEASUREMENT

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 13.1 Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: quoted market price (unadjusted) in active markets for an identical assets or liabilities;
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023 and June 30, 2023, the Fund held the following financial instruments measured at fair value:

#### 12. TAXATION

The income of the Fund is exempt from income tax under Clause 99 of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. Since the Management Company intends to distribute at least 90% of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unit holders, therefore no provision for taxation has been made in these condensed interim financial statements.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

#### 13. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023 and June 30, 2023, the Fund held the following financial instruments measured at fair value:

	As at September 30, 2023			
	Level 1	Level 2	Level 3	Total

Financial assets 'at fair value through profit or	r loss'

\* The carrying value of these securities approximate their fair value since these are short term in nature and are placed with counter parties which have high credit ratings.

#### 11. TOTAL EXPENSE RATIO

The annualised total expense ratio (TER) of the Fund as at September 30, 2023 based on current period results is 1.33% (September 30, 2022: 1.24%) which includes 0.17% (September 30, 2022: 0.10%) representing government levies on the Fund such as Sales Taxes, Federal Excise Duties, annual fee to the SECP etc. This ratio is within the maximum limit of 2.5% prescribed under the NBFC Regulations for a collective investment scheme categorised as an 'Income Scheme'.

#### 12. TAXATION

The income of the Fund is exempt from income tax under clause (99) of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. The Fund has not recorded any tax liability in respect of income relating to the current quarter as the Management Company intends to distribute at least 90 percent of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unitholders.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

#### 13. FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023 and June 30, 2023, the Fund held the following financial instruments measured at fair value:

	As at September 30, 2023

#### 11. TOTAL EXPENSE RATIO

The Total Expense Ratio (TER) of the Fund as at September 30, 2023 is 1.29% which includes 0.16% representing government levies on the Fund such as Sales Taxes and Annual fee to the SECP. This ratio is within the maximum limit of 2.5% prescribed under the NBFC Regulations for a collective investment scheme categorised as an Income Scheme.

#### TAXATION 12.

The income of the Fund is exempt from income tax under clause (99) of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. The Fund has not recorded any tax liability in respect of income relating to the current guarter as the Management Company intends to distribute at least 90 percent of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unitholders.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

#### FINANCIAL INSTRUMENTS - FAIR VALUES 13.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 13.1. Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Fair value measurements using quoted price (unadjusted) in an active market for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurement using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2022, the Fund held the following financial instruments measured at fair value:

	As at September 30, 2023 (unaudited)					
	Level 1	Level 2	Level 3	Total

#### 3 BASIS OF PREPARATION

#### 3.1 Statement of compliance

These condensed interim financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards applicable in Pakistan comprise of:

- International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017;

Where provisions of and directives issued under the Companies Act, 2017 part VIIIA of the repealed Companies Ordinance, 1984, the NBFC Rules, the NBFC Regulations and the requirements of the Trust Deed differ from the IFRSs, the provisions of and directives issued under the Companies Act, 2017 part VIIIA of the repealed Companies Ordinance, 1984, the NBFC Rules, the NBFC Regulations and the requirements of the Trust Deed have been followed.

The disclosures made in these condensed interim financial statements have, however, been limited based on the requirements of the International Accounting Standard 34: 'Interim Financial Reporting'. These condensed interim financial statements do not include all the information and disclosures required in a full set of financial statements and should be read in conjunction with the published financial statements of the Fund for the period ended June 30, 2023.

#### 4 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

- 4.1 The accounting policies adopted and the methods of computation of balances used in the preparation of these condensed interim financial statements are the same as those applied in the preparation of the financial statements of the Fund for the period ended June 30, 2023.
- 4.2 The preparation of the condensed interim financial statements in conformity with accounting and reporting standards as applicable in Pakistan requires management to make estimates, assumptions and use judgments that affect the application of policies and reported amounts of assets, liabilities, income and expenses. Estimates, assumptions and judgments are continually evaluated and are based on historical experience and other factors, including reasonable expectations of future events. Revisions to accounting estimates are recognised prospectively commencing from the period of revision. In preparing the condensed interim financial statements, the significant judgments made by management in applying the Fund's accounting policies and the key sources of estimation and uncertainty were the same as those applied to the financial statements at and for the period ended June 30, 2023. The Fund's financial risk management objectives and policies are consistent with those disclosed in the financial statements for the repriod ended June 30, 2023.
- 4.3 There are certain amendments to the published accounting and reporting standards that are mandatory for the Fund's annual accounting period beginning on July 1, 2023. However, these do not have any significant impact on the Fund's operations and, therefore, have not been detailed in these condensed interim financial statements.

FAIR VALUE MEASUREMENT	

#### 13 FAIR VALUE MEASUREMENT

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023, the Fund held the following financial instruments measured at fair values:

#### 16 FAIR VALUE MEASUREMENT

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.'

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at June 30, 2023, the Fund held the following financial instruments measured at fair values.

#### 11. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 11.1 Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Fair value measurements using quoted price (unadjusted) in an active market for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurement using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2022 and June 30, 2022, the Fund held the following financial instruments measured at fair value:

As at September 30, 2023						
Level 1	Level 2	Level 3	Total

#### TOTAL EXPENSE RATIO 12.

The Total Expense Ratio (TER) of the Fund as at September 30, 2023 is 3.93% (June 30, 2023: 3.97%) which includes 0.40% (June 30, 2023: 0.31%) representing government levies on the Fund such as Sales Taxes, Federal Excise Duties, annual fee to the SECP etc. This ratio is within the maximum limit of 4.5% prescribed under the NBFC Regulations for a collective investment scheme categorised as an Equity Scheme.

#### 13. TAXATION

The income of the Fund is exempt from income tax under Clause 99 of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. Since the Management Company intends to distribute at least 90% of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unit holders, therefore no provision for taxation has been made in these condensed interim financial statements.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

Revisions to accounting estimates are recognised prospectively commencing from the period of revision. #### 11. TOTAL EXPENSE RATIO

The Total Expense Ratio (TER) of the Fund as at September 30, 2023 is 3.99% (September 30, 2022: 3.90%) which includes 0.39% (September 30, 2022: 0.31%) representing government levies on the Fund such as sales taxes, annual fee to the SECP, etc. This ratio is within the maximum limit of 4.5% (excluding govt. levies) prescribed under the NBFC Regulations for a collective investment scheme categorized as an Equity Scheme.

#### 12. TAXATION

The income of the Fund is exempt from income tax under clause (99) of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. The Fund has not recorded any tax liability in respect of income relating to the current quarter as the Management Company intends to distribute at least 90 percent of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unitholders.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

#### 13. FAIR VALUES OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the statement of assets and liabilities date.

The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 13.1 Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that

reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Fair value measurements using quoted price (unadjusted) in an active market for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurement using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023 the Fund held the following financial instruments measured at fair value:

#### 11 TOTAL EXPENSE RATIO

The Total Expense Ratio (TER) of the Fund as at September 30, 2023 is 2.05 % (September 30, 2022: 1.92%) which includes 0.29% (September 30, 2022:0.19%%) representing government levies on the Fund such as sales taxes, annual fee to the SECP, etc. This ratio is within the maximum limit of 4.5% (excluding govt. levies) prescribed under the NBFC Regulations for a collective investment scheme categorized as an Equity Scheme.

#### 12 TAXATION

The income of the Fund is exempt from income tax under clause (99) of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. The Fund has not recorded any tax liability in respect of income relating to the current quarter as the Management Company intends to distribute at least 90 percent of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unitholders.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

#### 13 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 13.1 FAIR VALUE HIERARCHY

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Fair value measurements using quoted price (unadjusted) in an active market for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurement using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023 and June 30, 2023, the Fund held the following financial instruments measured at fair value:

		As at September 30, 2023			
	Level 1	Level 2	Level 3	Total	
ASSETS		(Rupees in '000)			
Financial assets 'at fair value through profit or loss' Shares of listed companies - 'ordinary shares'	2,524,295	-	-	2,524,295

#### 11. TOTAL EXPENSE RATIO

The Total Expense Ratio (TER) of the Fund as at September 30, 2023 is 3.73% (September 30, 2022: 3.51%) which includes 0.41% (September 30, 2022: 0.32%) representing government levies on the Fund such as sales taxes, annual fee to the SECP, etc. This ratio is within the maximum limit of 4.5% (excluding govt. levies) prescribed under the NBFC Regulations for a collective investment scheme categorized as an Equity Scheme.

#### 12. TAXATION

The income of the Fund is exempt from income tax under clause (99) of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. The Fund has not recorded any tax liability in respect of income relating to the current quarter as the Management Company intends to distribute at least 90 percent of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unitholders.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.

#### 13. FINANCIAL INSTRUMENTS - FAIR VALUES

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market

participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradeable in an open market are revalued at market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 13.1. Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Fair value measurements using quoted price (unadjusted) in an active market for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurement using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023 and June 30, 2023, the Fund held the following financial instruments measured at fair value:

	As at September 30, 2023				
	Level 1	Level 2	Level 3	Total

#### 11. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

Underlying the definition of fair value is the presumption that the Fund is a going concern without any intention or requirement to curtail materially the scale of its operations or to undertake a transaction on adverse terms.

Financial assets which are tradable in an open market are revalued at the market prices prevailing on the statement of assets and liabilities date. The estimated fair value of all other financial assets and liabilities is considered not to be significantly different from the respective book values.

#### 11.1 Fair value hierarchy

International Financial Reporting Standard 13, 'Fair Value Measurement' requires the Fund to classify assets using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: Fair value measurements using quoted price (unadjusted) in an active market for identical assets or liabilities.
- Level 2: Fair value measurements using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: Fair value measurement using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

As at September 30, 2023 and June 30, 2023, the Fund held the following financial instruments measured at fair value:

	As at September 30, 2023						
ASSETS	Level 1	Level 2	Level 3	Total			
		(Rupee:	s in '000)				
Financial assets 'at fair value through profit or loss'							
Shares of listed companies 'ordinary shares'	567,417	-	-	567,417			
		As at Jur	ne 30, 2023				
ASSETS	Level 1	Level 2	Level 3	Total			
		(Rupee:	s in '000)				
Financial assets 'at fair value through profit or loss'							
Shares of listed companies 'ordinary shares'	443,644	-	-	443,644			

#### 12. TOTAL EXPENSE RATIO

The Total Expense Ratio (TER) of the Fund as at September 30, 2023 is 4.87% (September 30, 2022: 3.87%) which includes 0.50% (September 30, 2022: 0.32%) representing government levies on the Fund such as sales taxes, annual fee to the SECP. This ratio is within the maximum limit of 4.5% prescribed under the NBFC Regulations for a collective investment scheme categorised as an Equity Scheme.

#### 13. TAXATION

The income of the Fund is exempt from income tax under clause (99) of Part I of the Second Schedule to the Income Tax Ordinance, 2001 subject to the condition that not less than 90% of the accounting income for the year as reduced by capital gains, whether realised or unrealised, is distributed amongst the unit holders as cash dividend. Furthermore, as per Regulation 63 of the Non-Banking Finance Companies and Notified Entities Regulations, 2008, the Fund is required to distribute not less than 90% of its accounting income for the year derived from sources other than capital gains as reduced by such expenses as are chargeable thereon to the unit holders. The Fund has not recorded any tax liability in respect of income relating to the current guarter as the Management Company intends to distribute at least 90 percent of the Fund's accounting income for the year ending June 30, 2024 as reduced by capital gains (whether realised or unrealised) to its unitholders.

The Fund is also exempt from the provisions of section 113 (minimum tax) under clause 11A of Part IV of the Second Schedule to the Income Tax Ordinance, 2001.
