## CIO Note: February 2024 Market continues its upward trend with the formation of new government!

### Dear Investor,

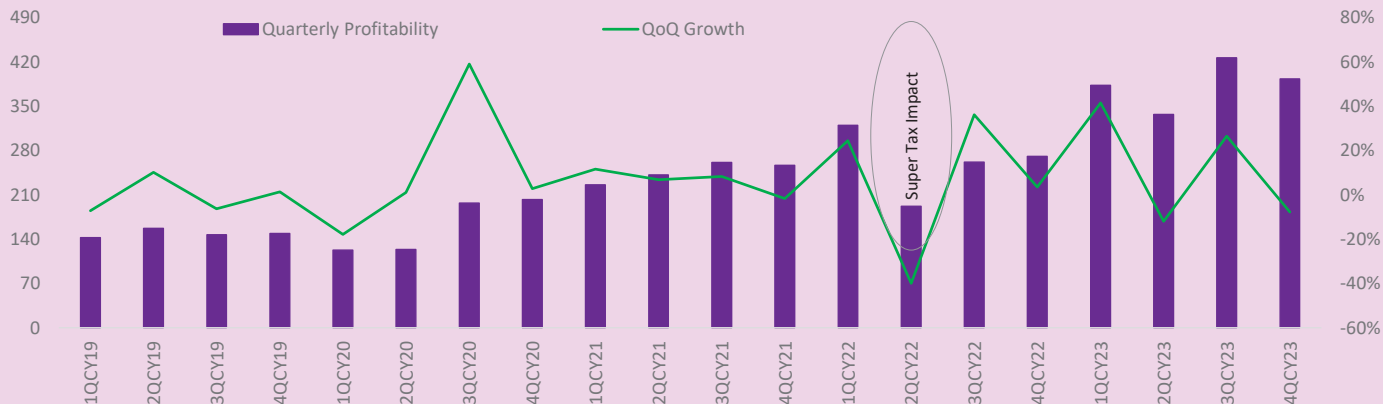

The stock market continued its upward trajectory after witnessing brief correction, with both KMI 30 and KSE 100 indices increased by 4.96% and 4.19% respectively. The month started on a negative note due to political uncertainty with regards to the concerns on general election results and news flow that IMF rejected the circular debt management plan. However, the stock market witnessed strong rebound in the second half of the month post-election with the smooth formation of the new government. Moreover, second round of gas price increase by the government and Rs. 26 mn net buying by foreigners during the month further boosted the investor confidence. Overall, during first eight months of FY24, the KSE 100 index has demonstrated impressive performance, surging by 55.8%, mainly driven by strong corporate profitability, robust domestic and foreign institutional investors buying in the wake of a successful IMF review, formation of new government and government's effort to contain the rising energy sector circular debt issue.

On the economic front, the CPI for the month of February 2024 clocked in at 23.1% YoY, primarily driven by an increase in prices of food and housing compared to the 28.3% recorded in January 2024. This brings the average inflation for 8MFY24 to 28.0%, up from 26.2% in the same period last year. The current account balance turned from a surplus of USD 404 mn in December 2023 to a deficit of USD 269 mn in January 2024. The key factors contributing to this deficit were a 11% YoY surge in total import, while total exports decreased by 4%. However, remittances witnessed a 26% YoY increase in Jan 2024. During 7MFY24, the CAD declined by 71% YoY to USD 1.1 bn as compared to a deficit of US 3.8 bn recorded during the same period last year.

### Robust corporate earnings

The profitability of the KSE 100 index continues to rise to new heights, posting a robust growth of 51% YoY in CY23 even though the quarterly profitability has declined by 8%. The growth in profitability during CY23 was attributable to an enormous surge in growth of Banks, E&Ps, Power and Fertilizers sector performance.

## Key triggers going forward

The key trigger for the stock market performance going forward are;

- IMF third loan tranche of USD 1.1 billion under the USD 3 billion Stand-By Arrangement (SBA) expected to be received soon.
- Discussions with IMF to begin for another Extended Fund Facility (EFF) program.
- Inflation and interest rates are likely to peak out and expected to decline over the period which will increase corporate profitability and lead to more inflows into equities.
- Government's commitment to implement structural reforms for resolving the circular debt issue.

The valuations continue to remain very attractive, by historical averages, with the market trading at a forward P/E ratio of around 3.9x compared to its long-term average P/E of about 7.8x. PSX is also significantly underpriced compared to the MSCI Frontier Market Index's forward P/E multiple of 11x.

**Advice for investors:** Investors looking to invest for shorter tenors with low to medium risk are advised to invest in our Money Market and Income Funds given high-interest rates. On the other hand, investors with a high-risk appetite and medium to long-term view should continue to enhance long-term exposures to equities at these levels as economic conditions will continue to improve gradually as the forex reserve situation improves and the election roadmap is finalized.

## Stock Market Review

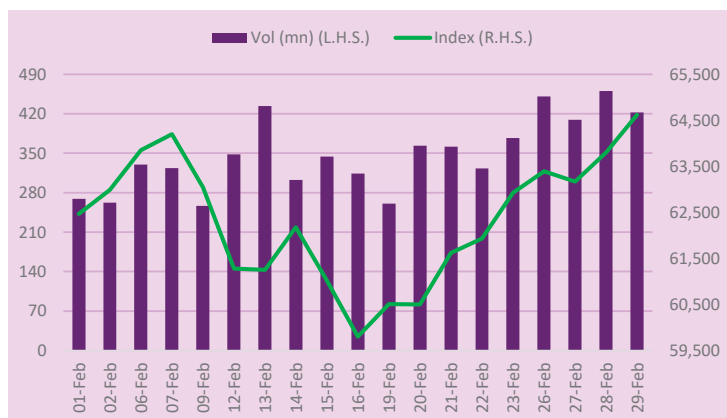

During the month of February 2024, the KSE-100 index increased by 2,599 points (up 4.19%) to close at 64,578 points. The average daily volume of the market stood at 349 mn shares, down by 29% on a MoM basis. Banks, Fertilizer and Auto Assemblers were the major positive contributing sectors to the Index performance.

The major reason behind the increase in the stock market performance were the clarity on the political front post general elections and formation of the new government. Further, second round of gas price increase kept the energy chain stocks in the lime light. Moreover, China agreed to rollover USD 2 bn debt which was expected to mature in March 2024.

Foreigners were net buyers with net buying aggregating USD 26 mn during the month while on local front Companies, Banks and Individuals were major sellers with net selling aggregating USD 8 mn, USD 7 mn and USD 6 mn respectively. The oil prices increased by 2% during the month with Brent closing at USD 83.62/barrel.

While near-term volatility cannot be ruled out, we maintain a long-term positive outlook on the equity market. We encourage investors to enhance their long-term exposures to equities at these levels.

### MGOKPPF Money Market Sub Fund

### Salient Features

- \* The government of Khyber Pakhtunkhwa (KPK) has successfully transitioned from traditional defined-benefit pensions to a Voluntary Pension System (VPS) for its civil servants.
- \* The new VPS scheme is aimed at providing better benefits and more security to retirees and will eventually replace the old and outdated pension system.
- \* The K-P government has engaged several pension fund managers to ensure that the new scheme remains self-financing and doesn't become a burden on the government.
- \* As an industry leader, Al Meezan has launched its Meezan GOKP Pension Fund (MGOKPPF) on 14th December 2023.
- \* MGOKPPF shall consist of four sub-funds: Equity, Equity-Index, Debt, and Money Market. However, for initial three years, only Money Market sub-fund will remain active.
- \* MGOKPPF offers lucrative allocation schemes for the benefit of investors.
