## CIO Note: March 2024

### Stock market soars to all-time highs due to easing of inflation and attractive valuation!

#### Dear Investor,

The stock market continued its upward momentum, reaching at the all-time high level with both KMI 30 and KSE 100 indices increased by 3.23% and 3.76% respectively during the month. These positive trends were attributed to the new government taking office with the optimism of the economic stability especially with the appointment of a technocrat as the new Finance Minister. Further, the IMF team has reached a staff-level agreement with the Pakistani authorities on the second and final review of Pakistan's stabilization program. Additionally, Pakistan secured funding of around USD 150 mn from the World Bank for various project upgrade.

Overall, during first nine months of FY24, the KSE 100 index has demonstrated impressive performance, surging by 61.6%, mainly driven by strong corporate profitability, robust domestic and foreign institutional investors buying in the wake of a successful IMF review, formation of new government and government's effort to contain the rising energy sector circular debt issue.

On the economic front, the CPI for the month of March 2024 clocked in at 20.7% YoY, primarily driven by an increase in prices of food and housing compared to the 23.1% recorded in February 2024. This brings the average inflation for nine months of FY24 to 27.2%. The interbank PKR-USD exchange rate remained stable during the month, closed at 277.94 at March 31, 2024. The international oil prices increased by 4.62% during the month, with Brent closed at USD 87.48 per barrel due to supply concerns.

## Current account balance continued to improve

Pakistan's current account balance continued to improve during the nine months of FY24, with a deficit of only USD 1.0 billion during the eight months of FY24 period, an impressive decline of 74% YoY from USD 3.8 billion in the same period last year. This was driven by a 10% YoY increase in goods exports to USD 20.5 billion and a 9% YoY decrease in goods imports to USD 34.0 billion. Consequently, the trade deficit contracted by 28% YoY to USD 13.5 billion. Worker remittances were almost flat YoY at USD 18.0 billion during the period.

## Key triggers going forward

The stock market is anticipated to continue its upward momentum, driven by various factors expected in the forthcoming period. Firstly, inflation rate has been on downward trajectory from its recent peak and interest rate is also expected to decline gradually which will bring much needed liquidity into equities. Moreover, the IMF team has reached a staff-level agreement with the Pakistani authorities on the final review of the USD 3 billion Stand-By Arrangement (SBA). The government is also planning to secure a new long-term IMF program to repay loans and strengthen its forex reserves. The approval of the new program is expected to pave the way for accessing funds from bilateral, multilateral, and other sources. Furthermore, the government's commitment to structural reforms for resolving the circular debt issue, adds another layer of confidence in the equity market's potential.

The valuations continue to remain very attractive, by historical averages, with the market trading at a forward P/E ratio of around 4.1x compared to its long-term average P/E of about 8.0x with dividend yield of 9.3%, while selected blue chips are offering dividend yield in excess of 15%.

**Advice for investors:** Investors looking to invest for shorter tenors with low to medium risk are advised to invest in our Money Market and Income Funds given high-interest rates. On the other hand, investors with a high-risk appetite and medium to long-term view should continue to enhance long-term exposures to equities at these levels as economic conditions will continue to improve gradually as the current account balance and forex reserve situation improves.
