- **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;

- **Credit Spread Risk** - The risk that there may be an increase in the difference between the return/markup rate of any issuer's security and the return/markup rate of a risk free security. Country or Political Risk:

This is the uncertainty of returns caused by the possibility of a major change in the political or economic environment of the country such as break down of law and order, war, natural disasters, etc. and any governmental actions, legislative changes or court orders restraining payment of principal or income.

Interest Rate Risk:

A rise or decline in interest rates during the investment term may result in a change in return provided to the investors.

Other Risks:

Government Regulation Risk - Government policies and the law regulate different sectors of the economy to varying extent. Funds that invest in these sectors may be affected due to change in these regulations or policies, which directly or indirectly affect the earnings and/or the cash flows. Additionally, governmental or court orders may restrain payment of capital, principal or income.

Sovereign Risk: Payment of bonds/ notes may be effected by the economic and political events in the country of the relevant issuer. The occurrence of a sovereign risk event could result in the loss of all or a portion of the principal invested, as a result of any economic or political circumstance.
