DIRECTORS' REPORT

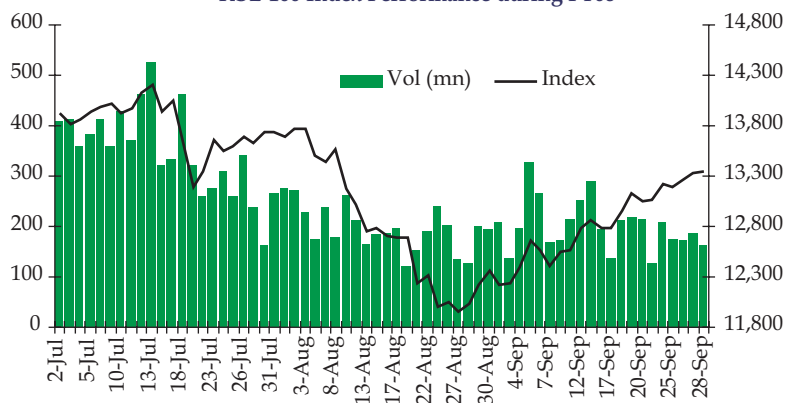

The Board of Directors of Al Meezan Mutual Fund Limited (the Fund) is pleased to present the quarterly accounts of the Fund for the three months ended September 30, 2007.

Market Review

The Stock Market during the first quarter of the financial year was marked by volatility in trend and turnover. The market movements during the quarter can be segmented into three distinct phases; the positive, the slump and the recovery. Overall, the KSE-100 index during the quarter shed 419 points or 3% to finish the quarter at 13,353 with an average daily turnover of 250 million shares.

The new financial year started on a positive note and the Index continued its upward momentum from previous year, making an all time high of 14,202 on July 13, 2007. However this upward movement failed to maintain itself primarily due to rising political uncertainty in the country. News regarding failed talks between leading political parties and the Government, suicidal attacks after the Lal Masjid operation, uncertainty regarding President's re-election and significant outflows of foreign funds led to a decline of 1,200 points in just one week, shedding a total of 1,500 points (11%) during the slump phase and making a low of 11,958 on August 27, 2007. The market completely ignored the robust profitability and handsome dividend payouts by the companies. Moreover, sub prime mortgage crisis in the US which led to persistent sell off in equity markets globally, further weakened market sentiment and contributed to this downtrend. However, later in September positive developments on political front and strong fundamentals helped in an impressive recovery of 1,400 points till close of the period from the lowest level. Moreover, foreign funds which had divested their holdings during first couple of months started to invest in Pakistan again as foreign investors realized the fact that Pakistan's Capital Markets are not likely to be influenced by the sub prime crisis which had mostly affected the developed countries.

KSE-100 Index Performance during FY08

Operational Review

During the three months ended September 30, 2007, the Fund earned gross income of Rs.78 million, main contributors of which were realized capital gains of Rs. 21 million and dividend income of Rs.14 million. After accounting for expenses of Rs. 13 million and revaluation surplus of Rs. 34 million the Fund recorded a net profit of Rs.65 million for the period under consideration. This translates into earning per share of Rs.0.52. The net assets of AMMF as at September 30, 2007 stood at Rs.1,982 million which is equivalent to net asset value per share of Rs.14.41.

The Fund for the year ended June 30, 2007 had declared bonus shares @ 15% i.e. 15 shares for every 100 shares held along with cash dividend of 25 % i.e. Rs.2.5 per share of par value of Rs.10/- each. The bonus shares were allotted during the quarter ended September 30, 2007.

Mutual Fund Rating

Pakistan Credit Rating Agency (PACRA) has assigned 4-Star to AMMF which denotes good performance of the fund versus its peers. The management of the fund is striving to improve this rating further in the future.

Future Outlook

As the political uncertainty starts to subside we remain hopeful of the future prospects of the stock market in general and of Al Meezan Mutual Fund Limited in particular. While the minor corrections in the market may continue to take place in the short term, mainly due to nebulous political affairs, we believe that the long term direction would continue to be guided by the overall economic growth in the country and increasing foreign funds inflows on the back of positive investment and economic outlook of the country.

We take this opportunity to thank our valuable investors for reposing faith in us and making us the largest Shariah Compliant Investment Advisor in Pakistan. We also thank the regulator, Securities and Exchange Commission of Pakistan, AMMF's Custodian, the Central Depository Company of Pakistan and the management of Karachi Stock Exchange for all their support and guidance.
