REPORT OF THE DIRECTORS OF THE MANAGEMENT COMPANY FOR THE HALF YEAR ENDED DECEMBER 31, 2008

The Board of Directors of Al Meezan Investment Management Limited, the management company of Meezan Islamic Fund is pleased to present the un-audited financial statements of the fund for the half year ended December 31, 2008.

Market Review

The first half of FY09 witnessed a bearish trend in the stock market with KSE-100 index falling from its high of 12,221 to close the year at 5,865, a decline of 52%. There was a substantial decline in daily average traded volume to 41 million shares as compared to 261 million shares during the corresponding period last year, a decline of 84%.

Economic Review

The macroeconomic outlook remained bearish during the initial months of FY09 as inflationary pressures mounted and current account deficit continued to widen unabated. The main reason for widening of the current account deficit was worsening of trade balance. Due to the extraordinary increase in international crude prices, which peaked at US\$ 147 per barrel in mid July, and later hike in food prices, Pakistan's trade deficit continued to rise and reached US\$ 5.84 billion in first four months of FY09. As a result, foreign exchange reserves declined to US\$ 6.6 billion on November 21, 2008 from the level of US\$ 11.4 billion at the beginning of period. This also created pressure on rupee against US dollar.

Subsequently, government administered much needed macro stabilization measures like subsidy removal, fiscal deficit management, monetary tightening, additional tariff imposition towards luxury items and tightening of forex market regulations. The impact of these decisions along with reversal in global commodity prices helped in bringing down current account deficit and inflationary pressure. Subsequently, a Stand-By Arrangement with IMF for providing US\$ 7.6 billion over 23 month period along with strong remittance inflows helped in reserve replenishment which crossed US\$ 10 billion again and also helped in stabilization in the rupee-dollar parity. On the domestic front, Government of Pakistan remained ahead of its tax collection target during six months and collected Rs. 548 billion which also helped in providing some relief to the burgeoning government borrowing.

Equity Market Review

The downward trend at KSE that began towards the end of FY08 continued into the first half of FY09. To arrest the sharp decline, Securities and Exchange Commission of Pakistan (SECP) changed the circuit breakers to a floor of 1% and a cap of 10% at the end of FY08. This measure, however, did not improve the situation and created a problem for margin traders who wanted an exit. Due to the drying up of volumes after the introduction of these circuit breakers, the SECP decided to revert them back to the original 5% level in early July 2008.

Nonetheless, the unabated economic pressures and downgrade of Pakistan's credit rating from B2 to B3 by Moody continued to create further downward pressure. To stem further downslide in the market, KSE Board of Directors on August 27, 2008 decided to place a floor on the index at a level of 9,144 based on the closing prices of August 27. As a result, investors decided to stay away from the regular market where the volumes went down to less than a million shares in a day. However, limited trading took place in off the market counter at 20%-50% discount from the floor prices.

Subsequently, after 110 days on December 15, 2008 the floor was finally removed with the KSE-100 Index undergoing heavy correction falling by 36% in last 15 days and closed the half year at the level of 5,865. With the removal of the price floors, the brokers, who got margin calls from the financiers and were on the verge of default, were ultimately bailed out by financiers and government institutions. Initially trading in the ready market was nominal as prices corrected by 5% daily limit for several days. However, towards the end of the month, volumes picked up in scrips of fertilizer, power and gas distribution sectors.

The US subprime mortgage crises, which led to the collapse of many financial giants including Lehman Brothers, resulted in major financial downturn in the world markets. Even after governments' continuous liquidity injections, the bearish trend continued so much so that IMF termed this crisis as the worst after Great Depression. In line with increasing outflows from the emerging markets and with the removal of Pakistan from MSCI Emerging Market Index, foreigners remained net sellers at KSE with total outflow of US\$ 178 million in the first half of FY09.

Operational Review

Meezan Islamic Fund's (MIF) during the 1HFY09 incurred a net loss of Rs. 3,155 million as compared to net profit of Rs. 472 million earned during 1HFY08.

For the six months ended December 31, 2008, the fund incurred gross loss of Rs. 3,245 million (1HFY08: Gross profit of Rs. 350 million), main contributor of which was capital loss (realized and unrealized) of Rs. 3,410 million (1HFY08: Capital gain of Rs. 196 million) compensated by dividend income of Rs. 157 million (1HFY08: Rs. 125 million). After accounting for expenses of Rs. 58 million (1HFY08: Rs. 78 million) and element of income / capital gain on purchase and sale of units of Rs. 149 million (1HFY08: Rs. 200 million), the fund recorded net loss of Rs. 3,155 million (1HFY08: Net profit of Rs. 472 million) for the six month period. The net assets of MIF decreased from Rs. 6,034 million at the beginning of the six month period to Rs. 2,534 million by the end of it, mainly due to decline in market value of investment. It will be pertinent to mention here that MIF still continues to be the largest equity fund in private sector.

Future Outlook

With greater fiscal discipline, tight monetary policy, stabilization of the Rupee and sustained weakness in international commodity prices, the government has now firmed up its grip on underlying economic fundamentals through the help of various multilateral donor agencies, particularly IMF which is spearheading Pakistan's economic revival. We expect that these corrective measures will bring back the country into more stable economic territory. Moreover, as Pakistan has succeeded in meeting all of the IMF targets for December 31, 2008, we expect SBP will not further tighten the monetary policy. Going forward, it is expected that equity market will stabilize since it is currently trading at attractive multiples.
