DIRECTORS' REPORT

The Board of Directors of Al Meezan Mutual Fund Limited (AMMF) is pleased to present the un-audited financial statements of fund for the quarter ended September 30, 2009.

Economic Review

Pakistan has shown gradual recovery and improvement on the macroeconomic front in the first quarter of fiscal year 2010. Rising year-on-year inflation which averaged 20% last year, eased off to 10.12% at the end of current quarter. Release of IMF tranche and improved balance of trade numbers provided impetus to the economy. As a result, foreign exchange reserves increased from US\$ 11.89 billion in June 2009 to US\$ 14.49 billion at the end of September 2009. This helped in stabilizing rupee against US dollar with the rupee depreciating by only 2% in the period under review. Moreover, remittance inflows made new records, with the first quarter fiscal year 2010 figure totaling US\$ 2.3 billion, providing support to the balance of payment situation. On domestic front, Government of Pakistan has almost achieved the collection target for the quarter of Rs. 270 billion which also helped in providing relief to the government borrowing.

To stabilize the economy and in view of the declining inflation, State Bank reduced the policy rate by 100 bps to 13%. Moreover to meet IMF requirements, the central bank introduced an interest rate corridor, providing a reverse repo facility at 300bps below the repo rate. This helped in maintaining overnight interbank rates within a close band of 11.5% to 12.5%.

Equity Market Review

The market witnessed a turnaround in the first quarter ended September 30, 2009 as KSE-100 Index appreciated 2,188 points to close the quarter at 9,350 marking 31% improvement from 7,162 levels on June 30, 2009. This was the highest return posted by the KSE-100 index in single quarter since calendar year 2002. This is in sharp contrast to the same period last year when the equity market fell by 24.9%. There was a substantial increase in daily average volume to 188.6 million shares as compared to 66 million shares during the corresponding period last year, an increase of 186%.

At the beginning of the quarter, there was uncertainty about the discount rate cut by the Central Bank in the monetary policy statement which was scheduled on July 25, 2009 but was later delayed to August 15, 2009. This delay caused some concern in the market regarding any possible discount rate cut and the release of IMF third tranche. However, the market soon recovered in the beginning of August with the disbursement of IMF tranche, continuous decline in the CPI inflation and improved balance of trade numbers. Moreover, better than expected corporate results were another booster for the market.

Later in August 2009, 100bps cut in discount rate coupled with improvement in Pakistan's rating by Moody's and Standard & Poor improved the foreigners' confidence in Pakistan's stock market. Hence, the quarter witnessed a net foreign inflow of US\$ 235 million as compared to a net outflow of US\$ 445 million in the fiscal year 2009. As a result of these inflows, the market broke the critical level of 9,000 and reached to the highest level of 9,700.

However, towards the end of the quarter, the market underwent marginal technical correction due to below expectations development in the Friend of Democratic Pakistan (FoDP) meeting in New York and KSE-100 index closed the quarter at the level of 9,350. During the same period, KMI-30, the benchmark index, appreciated by 28.18% to close at 13,600.

Performance Review

The return on KSE - Meezan Index 30 serves as the benchmark for Al Meezan Mutual Fund (AMMF). During the quarter ended September 30, 2009, the NAV of AMMF increased by 28.33% as compared to the benchmark which appreciated by 28.18%.

The Fund, during the period ended September 30, 2009 earned a total income of Rs. 338 million, up from a loss of Rs. 491 million in the same period last year. The income for the period comprised primarily of un-realized gain on re-measurement of investments of Rs. 271 million and realized gain on sale of investments of Rs. 42 million. The dividend income for the period was Rs. 24 million, where as profit on saving accounts with banks stood at Rs. 1.3 million. After accounting for expenses of Rs. 8.6 million, net income for the period was Rs. 330 million which translates into an earnings per share (EPS) of Rs. 2.40 for the quarter ended September 30, 2009.

The net assets of the fund as on September 30, 2009 stood at Rs. 1,508 million. The net asset value (NAV) of the fund which was Rs. 8.54 per share as on June 30, 2009 appreciated by 28.33% to Rs. 10.96 as on September 30, 2009.

Outlook

After a turbulent 2008, Pakistan's economy has seen a steady turnaround in the year 2009 and all major economic indicators are pointing to greater stability ahead. The S&P rating upgrade has accelerated a pickup in foreign investment in Pakistan's equity market. Since June 2009, when KSE-100 index entered the MSCI Frontier Index, nearly US\$ 235 million has flowed into the stock market, reversing 18 months of capital flight. The significant build up of forex reserves has also improved confidence in country's ability in meeting its commitments. The credit default swap (CDS) on Pakistan 5 year sovereign bond has come down to 650 bps from a peak of 5,000 bps in October 2008.

The medium term economic and equity outlook depends on the materialization of pledged aid and key fiscal reforms to raise taxes and reduce subsidies. The KSE-100 index is currently trading at a P/E multiple of around 7.8, which is at a discount of 35% to the regional markets and offers potential upside. Global equity markets, particularly emerging markets have shown strong performance in the last quarter amid early signs of global economic recovery.
